

PERINATAL VERIFICATION SURVEYS

How the Process Works

COMPLETE THE SURVEY REQUEST FORM

This information will be used to determine your survey team and schedule. Ideally, submit your request 8-12 months prior to your anticipated designation date.

SCHEDULE SURVEY DATES

Our survey team coordinators will work from the hospital's requested time frame and the availability of our highly experienced surveyors to determine the dates for the two-day site visit.

COMPLETE A PRE-SURVEY QUESTIONNAIRE

Our coordinators will send a pre-survey questionnaire to gather program information that the surveyors will use to prepare for the site visit. We can answer any questions you may have to help program managers prepare for the survey.

MEET WITH THE TEAM FOR SURVEY

All site visits have the same structure and follow a simple agenda. It includes patient record reviews, discussion with representatives from the entire program, interviews with program leadership, a facility walk-through and a discussion of findings.

REVIEW SURVEY REPORT & SUBMIT

Texas Perinatal Services will submit a formal survey report within 30 days following the site visit. The hospital should review this report package and then submit it to designation coordinators at the Department of State Health Services.
