

MATERNAL CONSULTATIONS

ABOUT OUR CONSULTATIONS

Texas Perinatal Services can provide a consultation prior to a maternal designation survey. No other provider has the experience, expertise, or resources of our team. Our history of consultation services is proven to help hospitals be more successful during a designation survey and ultimately providing the best quality care to expecting mothers.

Our affordable consultations provide recommendations for improvement and identify potential deficiencies before a designation survey. Fewer contingency surveys are scheduled as a result of the consultations prior to a designation survey.

MATERNAL CONSULTATION FEE

Texas Perinatal Services provides consultations to hospitals seeking Level II, Level III, or Level IV of maternal designation. The consultation is \$6,500 and includes a nurse consultant.
